Otto von Guericke University Magdeburg

Otto von Guericke was born in 1602 in Magdeburg and as the mayor of Magdeburg from 1652 to 1653, he led the city through a time of great turmoil. Otto von Guericke is best known for his work in physics, particularly his experiments with air and the barometer. He was one of the first to realize the existence of air pressure, above all through his experiments with the barometer. Otto von Guericke was a prominent figure in the scientific community of his time and is remembered as one of the most significant physicists of the Baroque period.

The University's main areas of research - the neuroscience, dynamic sciences, information technology, economics & management, and the traditional strands of study in engineering and the natural sciences, information technology, economics & management are made possible by the proximity of the neighbouring research institutes. Over 14,000 students from all over the world study at the University, which is a modern university with a distinctive profile. Thanks to its position between Western and Eastern Europe, this is particularly evident in the comprehensive internationalization of its teaching and research. They do, on the other hand, appreciate the family atmosphere and truly green landscape of the river Elbe and dominated by a huge gothic-style cathedral, the Magdeburg Cathedral, which is more than 1,200 years old and has about 230,000 inhabitants. In the 19th century, the town developed into an important industrial and trade center. Today, Magdeburg is located approx. 160 km west of Berlin, the German capital. The university's main campus is the University's main campus, which is beautifully situated on the banks of the river Elbe and dominated by a huge gothic-style cathedral, the Magdeburg Cathedral, which is more than 1,200 years old and has about 230,000 inhabitants.

Otto von Guericke University Magdeburg is one of Germany's most innovative universities. Founded in 1994, it is a member of the innovative universities movement. As one of the recipients of the European Union's European Regional Development Fund, the University offers over 80 programmes across the nine faculties. The University offers a wide range of opportunities leading to recognized academic degrees - from the full fledged Bachelor's degree in the fields of study mentioned above, Master's degrees, and PhD degrees. FEM offers a variety of study programs, including the ISP Bachelor Program, the ISP Master Program in International Economics and Finance, and the ISP PhD Program in Management / Economics. The ISP Bachelor Program is designed to equip students with the present day's knowledge, skills, and methods necessary for professional and successful careers in the world of International Business and Economics.

The ISP Master Program in International Economics and Finance is designed to provide training in the fields of international economics and finance, as well as in the important international human resources management and finance, as well as in the important international aspects of the modern world economy. It is intended for students seeking a first academic degree in this sector and does not provide preparatory training for the many career opportunities in the fields of management, including, e.g., managerial, coordinating, organizational, and marketing tasks, as well as in international business management, as well as in international business.

The ISP PhD Program prepares students for a career in the world of International Business and Economics. It is intended for students with a strong background in economics, as well as for those who wish to pursue a career in the world of International Business and Economics. It is intended for students seeking to obtain a PhD degree in an environment of excellence. The program includes a wide range of courses, including research seminars, workshops, and practical projects. The program also includes a PhD thesis, which is intended to provide students with a solid foundation in the field of International Business and Economics.
